The MRACDS examination supplemented and helped cement much of my specialist training knowledge. The process to becoming a Member of the College is an integral step in the training to become a specialist in my chosen field. Apart from the benefits such as peer recognition and access to ongoing professional development, the examination process itself was very fulfilling. I learned to discuss and justify my treatment philosophies with some of the most experienced specialists in Australia. I would highly recommend membership to any new specialists.

Dr James Brichko, MRACDS(Endo) 2017

Do you want to set yourself apart within your specialty?
